

(TMI Focus, Vol. XXIII, No. 3, Summer 2001)

## **RESEARCH UPDATE**

Two undergraduate theses have been completed and accepted:

*Effects of Binaural Beat Frequencies on Relaxation* by Jamie Keeter-Borland and *The Effects of Music and Binaural Beat Stimuli on the Adult Human Relaxation Response* by Carol N. Bailey.

*The Frequency-Following Effect: A Double-Blind Study* has been undertaken by Richard C. Kennerly, MA, as his doctoral research.
